

SAN-AIR™ perfect air 24/7

PRODUCT DATA SHEET

Product Name: Split System bio-clean gel
Pack Size: Single 15g 10pk 15g
SKU: 630-001 630-033

Description:

- Specially designed to be used in split system air conditioners, the water based gel evaporates continuously sanitising the internal parts of the machine as well as decontaminating incoming & outgoing air streams.
- Kills 99.99% of airborne bacteria, mould, fungus and spores.
- As the product comes into contact with microbes via air or hard surfaces, it causes it to die by preventing bacteria from reproducing. It prevents mould from receiving oxygen, stopping growth and reproduction.
- Uses identical actives as TGA listed SAN-AIR Commercial Grade Disinfectant.
- Air Volume: Up to 400Litres/Second; 40-50m²
- Lifespan: 10-12 weeks once opened.

Applications:

- For use in bulk head split system air conditioning units for home or office.

Directions for use:

- Cut the across the nipple at end of the packet.
- Open the front of your air conditioning unit.
